

## 2022-2023 OHS Summer School Course Offerings

### **Summer School Credit Recovery**

This is an in-person class that is for the sole purpose of making up lost credits due to failure of core classes or lack of credits for graduation. The course is completed individually through online GradPoint.

The classes that can be recovered are as follows: English, Science, History, Math, and Health. Other considerations may be made for students severely behind in electives at the discretion of the appropriate counselor and/or administrator.

### **Seated Course Offerings**

**\*All courses are ½ Credit**

\*With limited virtual options

### **English**

#### **English I (½ English Credit)- HSS1000**

This course is designed to help students regain a half credit of **failed** English I. English I is designed to extend the student's English education in the following areas: composition, including proofreading and editing; research; vocabulary; literary analysis; test-taking skills; speaking and listening. The class is an excellent opportunity for students to polish communication skills needed for the Twenty-first Century.

#### **English II (½ English Credit)- HSS1011**

This course is designed to help students regain a half credit of **failed** English II. English II is designed to extend the student's English education in the following areas: composition, including proofreading and editing; research; vocabulary; literary analysis; test-taking skills; speaking and listening. The class is an excellent opportunity for students to polish communication skills needed for the Twenty-first Century.

#### **Creative Writing (½ English Credit) Online HSS0105V**

This course is a study of creative writing such as short stories, poetry, and nonfiction. The course will focus on a topic of composition including, but not limited to, sound, imagery, voice, and style. Students will study mentor texts, compose, revise, and self-reflect during the semester. Writing assignments will be aimed at encouraging creative thinking and peer feedback. Students will read essays, stories, and poetry by well-known authors to develop a writing style and enrich the creative writing process. The course will culminate in a major writing piece with a final multimedia project, as well as an online publication. Through the study of creative writing, students should complete this course with techniques of composition that can be used in various forms of writing.

This class is an elective English course for students who want to practice and hone creative writing skills. As a result of studying various forms of creative writing, composing, editing, and publishing work, student writing should improve. In addition, appreciation of creative writing as a literary form will also be gained.

Each class will require reading assignments, published blog entries, completed writing responses, peer reflection, and self-reflection. Smaller writing pieces will build toward the end of unit major writing pieces/projects.

## **Social Studies**

### **American History (½ Credit American History)- HSS7001**

This course is designed to help students regain a half credit of **failed** American History. This course will continue to assess the progress, the accomplishments, and the challenges facing the United States from the Civil War through World War II. Students will cover the political, social, and economic developments including westward expansion, migrations, and growth of industry, and analyze wars of the 20th century.

### **Intro. to American Government (½ Credit American Govt.)- HSS7008**

This course is designed to help students regain a half credit of **failed** Intro to American Government. This course takes an interesting look at the foundation of the federal, state, and local government and the transitions that have taken place up to the current time. The course discusses the rights of Americans and how the government works for the citizens. In addition, civic duty and responsibility are key components in this course. This course includes an EOC exam, along with the state-required US and Missouri Constitution exams.

## **Math**

### **Algebra I (½ Math Credit)- HSS3013**

This course is designed to help students to regain a half credit of **failed** Algebra I. Algebra students will develop skills in equations, graphing, polynomials, exponents, and inequalities within the real number system.

### **Algebra II (½ Math Credit)- HSS3004**

Prerequisite: Geometry or Honors Geometry

This course is designed to help students to regain a half credit of **failed** Algebra II. This course provides an opportunity to learn extended algebraic topics in order to develop reasoning and problem solving abilities. Students will enhance their existing algebra skills and develop skills working with polynomial functions, rational expressions, irrational and complex numbers, logarithms, probability and statistics.

### **Geometry (½ Math Credit)- HSS3006**

This course is designed to help students regain a half credit of **failed** Geometry. Students will have an opportunity to develop logical thinking and exploration of topics connecting algebra and geometry. Students will apply inductive and deductive reasoning to undefined terms, definitions, postulates, and theorems to reach conclusions about geometric figures.

## **Science**

### **Botany / Plant Science (½ Science Credit) - HSS6011**

This course provides an introduction to the classification, relationships, structure, function of plants and soil. There is an emphasis on the ecological relationships of plants between soil, animals, and humans. Topics include reproduction and development of seed and non-seed plants, and levels of organization (taxonomy). This class also is designed to bring the abstract concepts of science into practical and applicable context. There are many opportunities for hands-on learning and field study. Students will learn how to apply the concepts of this class to healthy life-long hobbies and careers.

### **Physical Science (½ Science Credit)- HSS6000**

This course is designed to help students regain a half credit of **failed** Physical Science. This is an exciting class that will give you a foundation in physics and chemistry with lab work and many hands-on activities. This class is offered at the freshman level and is a good foundational science class. This course is offered 1st block only.

### **Biology (½ Science Credit)- HSS6001**

This course is designed to help students regain a half credit of failed Biology. This course focuses on the study of organisms, their interdependence with the environment and each other, as well as the requirements for survival.

## **Additional Required Courses**

### **Personal Finance (Required ½ Personal Finance Credit) (Grades 11-12) Seated HSS0505 Online HSS0505V**

This course will provide students with practical life skills needed daily. With online resources such as Everfi Financial Literacy and Dave Ramsey's Foundations U, students will gain an understanding which will set them up to be successful in their future. Throughout this course students will get a further understanding of the following topics: income and taxes, checking and savings accounts, using credit wisely, managing money, investing, purchasing insurance, housing, buying cars, and more. Through this course, students gain a basic understanding of finance and are more confident and competent in making financial decisions when out on their own. **This course may be taken with permission to recover up to half a credit of Personal Finance.**

### **Fitness (½ PE or Elective Credit) Seated HSS0412 Online HSS0412V**

Students in this class will learn and gain an understanding of the need for lifetime physical fitness. Students will participate in group and individual activities to gain knowledge on how to develop all areas of health-related fitness. Students will need access to the internet, a computer and be able to videotape. This class will encompass learning a variety of ways to workout. Students will record workouts, log data, and create and design their own workouts.

### **Health (Required ½ PE credit) Seated HSS0400 Online HSS0400V**

The health curriculum focuses on the mental, physical, social and emotional areas of health. These health areas and current health issues are studied to help students make responsible decisions toward their overall wellness.

## **Electives**

### **ACT Prep (½ Elective Credit) (Grades 10-12)- HSS0714**

*Prerequisite: recommended to have taken Algebra II or Concepts of Algebra II.*

The purpose of the ACT Prep component of this class is to prepare students for the ACT Test. As future college students striving for college admission, the ACT score can be a very important element to the admissions process. The course will allow students to prepare in a structured instructional environment for their best possible test performance.

**CCE Summer school/CCE work (½ -1 ½ Practical Art Credit, depending on work hours) (Grades 10-12) Seated HSS0508 Online HSS0508V**

Students should be employed in work or internship that directly contributes to the development of the competencies necessary for successful employment in the field they have identified. The student must be concurrently enrolled in the CCE Summer School course to be accepted into the CCE work program. This course is a cooperative effort between the Ozark R-VI school district and area businesses. The student's employer and the course instructor work together to teach the skills and attitude required to be successfully employed in today's labor market. Students will complete detailed resumes, cover letters and participate in problem-based learning revolving around employment and/or internships.

**Photography (½ Fine Arts Credit) (Grades 10-12)- HSS0200**

Emphasis will be on the proper use, care, and function of creating a photograph, lighting techniques, and digital image manipulation. Students can use their own camera equipment, camera phone, or check out a camera from the school.

**Art Survey (1/2 Fine Arts Credit) (Grades 9-12)- HSS0924**

Art survey students will be introduced to a variety of art methods, processes, and media. Students will also explore the historical, cultural and economic aspects of art. By studying the arts through theory and practice students will gain a full understanding of the purpose of art in the world.

**Driver's Education (½ General Elective Credit) (Grades 10-12)- HSS0524**

This course is designed to help young and future drivers learn the skills, responsibilities, and behaviors required to be safe when operating a motor vehicle. In addition, this course will prepare students for the Missouri instruction permit test. *Students must be 15 to take this course. Driving time will be provided with a course cost of \$100.00 per student.*
